- Skin contact* : Not normally required.
- Eye contact* : Not normally required. Consult a physician if direct contact with pressurized material occurs.

Most important symptoms and effects, both acute and delayed

- : Oxygen may be toxic when inhaled at elevated pressures.

Indication of any immediate medical attention and special treatment needed

- : Treat symptomatically.

Extinguishing media

- Suitable extinguishing media* : CO2, dry chemical, foam, water spray, water fog.
- Unsuitable extinguishing media* : None.

Special hazards arising from the substance or mixture / Conditions of flammability

- : High oxygen concentrations vigorously accelerate combustion. Will support or initiate combustion or explosion of organic matter and other oxidizable material. Container explosion may occur under fire conditions.

SAFETY DATA SHEET

Special protective equipment and precautions for firefighters

Protective equipment for fire-fighters

- : Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Do not enter without wearing specialized protective equipment suitable for the situation. Firefighter's normal protective clothing (Bunker Gear) will not provide adequate protection. A full-body encapsulating chemical protective suit with positive pressure self-contained breathing apparatus (NIOSH approved or equivalent) may be necessary.

Special fire-fighting procedures

- : Evacuate personnel to safe areas. Firefighters should wear an approved full-face, self-contained breathing apparatus (SCBA) and impervious clothing. Remove all sources of ignition. Stop spill or leak at source if safely possible. Move containers from fire area if safe to do so. Keep containers cool until after the fire is out.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

- : Individuals involved in the cleanup must wear appropriate personal protective equipment. Deny entry to all unprotected individuals. Ensure adequate ventilation.

Environmental precautions : Ensure spilled product does not enter confined areas.

Methods and material for containment and cleaning up

- : Stop leak if you can do so without risk. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area).

Special spill response procedures

- : Follow prescribed procedures for reporting and responding to larger releases.

SECTION 7. HANDLING AND STORAGE

Precautions for safe handling

- : Use with adequate ventilation. Use explosion-proof equipment. Do not smoke. Avoid inhaling gas. Protect cylinders from damage. Do not cut, weld, braze, solder, drill, grind or expose containers to heat, flame, spark or other sources of ignition. Do not puncture, incinerate or expose to heat even when empty.

Conditions for safe storage : Protect cylinders from damage. Store in a cool, dry, well-ventilated area. Store away from areas of excessive heat, open flames, sparks, and other possible sources of ignition. Cylinders should be stored upright and firmly secured to prevent falling or being knocked over. Full and empty cylinders should be segregated. Use a "first in - first out" inventory system to prevent full cylinders from being stored for excessive periods of time. Outside or detached storage is preferred.

Incompatible materials : Reducing agents ;Combustible materials. ;Grease ;Oils ;Organic materials
